Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to an odor transporter, classified in class 004, subclass 213.
- II. Claims 9-11, drawn to a method of odor removal, classified in class 004, subclass 661.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case 1 applies as the apparatus particulars are not required .

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Edmonds on 7/21/04 a provisional election was made with traverse to prosecute the invention of I, claims 1-8. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-11 stand withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claims 9-11 have been canceled as per instructions given by Mr. Edmonds in the above referred to conversation.
